PROFESSIONAL SUMMARY

Backend developer with Python, using Django and SQL, and fullstack web development. Experience in industry with automation, PLC programming and frequency inverters. Strong ability to solve complex problems, learn quickly and work in a team.

KEY SKILLS

- Python, Django
- JavaScript, HTML5, Tailwind CSS, Bootstrap
- MySQL
- Programming logic
- REST APIs
- Git & GitHub
- Intermediate English (conversational)

EDUCATION

Technology in Systems Analysis and Development

UNINTER – Distance Learning

Started: 2026/1 – In progress

Electrical Engineering

Federal University of Santa Catarina (UFSC)

Started: 2009/2

Completed through 9th semester (currently on hold)

ABOUT ME

I have a solid foundation in programming logic gained through my Electrical Engineering studies at UFSC, combined with hands-on industry experience in automation. I currently develop web applications with Python/Django and JavaScript, always aiming to write clean, efficient and scalable code. I pick up new technologies quickly and enjoy turning problems into solutions.

Problem-solving skills

Engineering background and practice with complex systems.

Continuous learning

I enjoy deepening my knowledge of technologies and best practices.

Communication & teamwork

Easily adaptable and focused on collective results.

PROFESSIONAL EXPERIENCE

Technology in Systems Analysis and Development

- Development of own project.

Industrial Automation Technician (2006 – 2023)

Industries (various segments) – Blumenau/SC

- Programming and parameterization of frequency inverters.
- Development of PLC logic for industrial process control.
- Diagnosis and troubleshooting of electrical and automation systems.
- Involvement in continuous improvement and process optimization projects.

PROJECTS

Fear of the Night www.fearofthenight.com

Personal project – Fullstack

- Web application built with Django, JavaScript, HTML5, CSS, Bootstrap, Tailwind CSS and MySQL.
- Features include user authentication, posts, comments and an admin panel.
- Hosted in production with a custom domain.
- Modules for registration, search, reporting and user permissions.

ADDITIONAL TRAINING

- Online studies: Python, Django, JavaScript, Git, Databases
- Intermediate English – experience working with international teammates during college.
