PROFESSIONAL SUMMARY

Backend developer with Python, using Django and SQL, and fullstack web development. Experience in industry with automation, PLC programming and frequency inverters. Strong ability to solve complex problems, learn quickly and work in a team.

KEY SKILLS

- Python, Django
- JavaScript, HTML5, Tailwind CSS, Bootstrap
- MySQL
- Programming logic
- REST APIs
- Git & GitHub
- Intermediate English (conversational)

EDUCATION

Technology n Systems Analysis and Development

UNINTER – Distance Learning

Started: 2026/1 – In progress

Electrical Engineering

Federal University of Santa Catarina (UFSC)

Started: 2009/2

Completed through 9th semester (currently on hold)

ABOUT ME

Python developer with hands-on experience in Django, SQL, JavaScript, and web application development. I have a solid professional background in industrial automation, including PLC and variable frequency drive (VFD) programming, as well as fault diagnosis in complex industrial systems. This experience, combined with my degree from one of the country's top universities, has honed my analytical thinking, problem-solving capabilities, and ability to develop practical solutions. I am currently focusing on advancing my career in software development, with an emphasis on backend development using Python/Django and REST APIs.

Problem-solving skills

Engineering background and practice with complex systems.

Continuous learning

I enjoy deepening my knowledge of technologies and best practices.

Communication & teamwork

Easily adaptable and focused on collective results.

PROFESSIONAL EXPERIENCE

Technology n Systems Analysis and Development

- Development of own project.

Industrial Automation Technician (2006 –

2023) Industries (various segments) – Blumenau/SC

- Programming and parameterization of frequency inverters.
- Development of PLC logic for industrial process control.
- Diagnosis and troubleshooting of electrical and automation systems.
- Involvement in continuous improvement and process optimization projects.

PROJECTS

Fear of the Night www.fearofthenight.com

Personal project – Fullstack

- Web application built with Django, JavaScript, HTML5, CSS, Bootstrap, Tailwind CSS and MySQL.
- Features include user authentication, posts, comments and an admin panel.
- Hosted in production with a custom domain.
- Modules for registration, search, reporting and user permissions.

Speech Balloon Generator www.bubbleflow.lat

I developed BubbleFlow using HTML5, CSS3, and modern JavaScript, adhering to *Clean Code* principles and semantic markup. It is a specialized application that simplifies the task of placing text into speech bubbles within images.

ADDITIONAL TRAINING

- Online studies: Python, Django, JavaScript, Git, Databases
- Intermediate English – experience working with international teammates during college.
